

# Santrax<sup>®</sup> Payer Management

## *Santrax Electronic Visit Verification Aggregator*

*Increasing the Capacity to Care  
Improving the Process of Home Care*

Santrax EVV Aggregator is the newest offering in our innovative solution suite that supports Electronic Visit Verification (“EVV”) vendor neutrality in statewide programs. Santrax EVV Aggregator creates the Open EVV Environment™, offering the greatest flexibility for all stakeholders. Santrax EVV Aggregator eliminates common challenges to EVV programs by offering provider choice in how they implement EVV. Providers have the option to use the state selected EVV solution at no cost, or providers can continue using their own EVV solution. Santrax EVV Aggregator integrates data across all vendors into a powerful, holistic system.

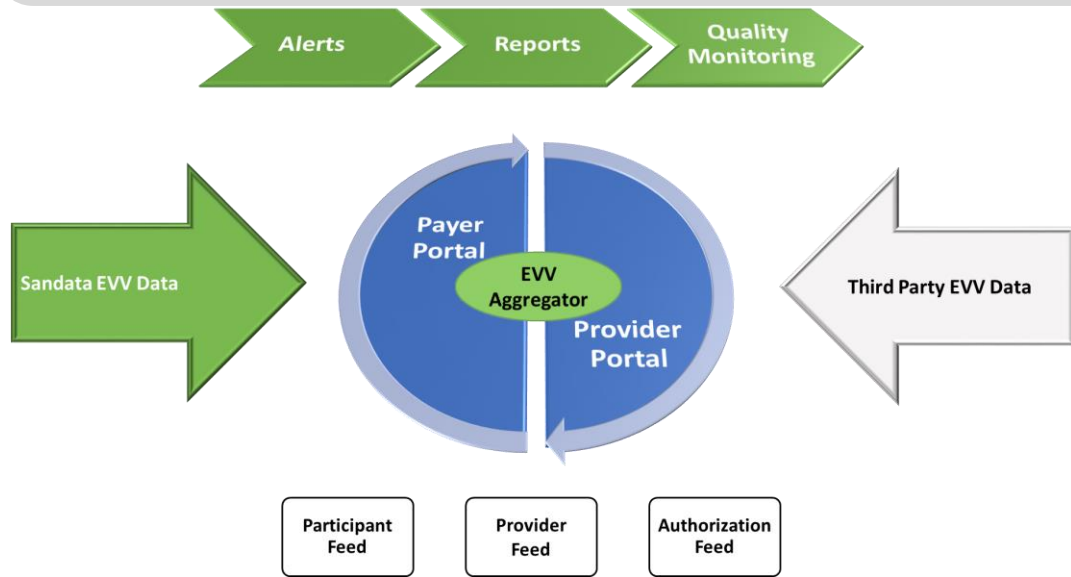

With Santrax Aggregator:

- Payers have control over program rules, maximum visibility and oversight;
- Providers have maximum flexibility to use systems that meet their business needs; and
- Participants are engaged and care is optimized.

**EVV qualifies for Enhanced Federal Match**

- **90% Implementation**
- **75% Program Fees**

# Santrax EVV Aggregator Overview

## Visit Verification

EVV Aggregator supports multiple verification methods including telephony, mobile visit verification (GPS), and device options. Providers can use their own EVV system with EVV Aggregator.

## Alerts

EVV Aggregator normalizes data across all EVV vendors, and provides real time alerts for late or missed visits, ensuring quality care deliver and visibility.

## Jurisdictional Oversight

Santrax EVV Aggregator is a repository for all EVV data, giving payers a uniform set of network rules, data and reporting.

Dashboards, alerts and reporting help the payer manage provider compliance and ensure care delivery.
