

Sandata Mobile Connect®

21st Century Cures Compliant

Mobile Technology for Visit Verification

Sandata Mobile Connect, an ADA compliant application, uses GPS technology to verify visits using GPS enabled devices. Sandata Mobile Connect works in both a connected and disconnected mode, ensuring that a visit can always be captured and verified regardless of whether cellular or Wi-Fi connectivity is available at the point of care.

Sandata Mobile Connect features and functionality include:

- Visit schedules are available for viewing/selection;
- Support for unscheduled visits;
- GPS based location verification;
- Task entry;
- Provider notes;
- Support for multiple languages; and
- Participant signature/voice recording.

A screenshot of the Sandata Mobile Connect application interface. The top bar is blue with a hamburger menu icon on the left and a right arrow icon on the right. Below the bar, the date 'Thursday, October 25, 2018' is displayed, followed by the provider name 'KELLY CARR', 'Clock-In: 01:47 PM', and 'Service: SPHH Aide (G0156)'. There are two blue buttons: 'ABANDON VISIT' and 'COMPLETE VISIT'. Below these are tabs for 'TASKS' and 'VISIT NOTE'. The 'TASKS' tab is active, showing a blue 'ADD TASKS' button. A list of tasks follows: 'Balance', 'Bathing' (checked), 'Blood pressure', 'Break 1 End', 'Break 1 Start', and 'Break 2 End'. Below the list, there is a section for 'Bathing' with two radio button options: 'Task Completed' (selected) and 'Client Refused'.

Sandata Mobile Connect is offered in a “Bring Your Own Device and Data” model where providers are responsible for device provisioning. Sandata also offers a full service mobile device management program that includes devices, data plans, provisioning and support.

- 90% Implementation
- 75% Program Fees

Sandata Mobile Connect Overview

Sandata Mobile Connect increases the productivity of the provider network – supporting dynamic scheduling and point of care service verification with member signature.

1. Did the member experience any falls during this shift?

Yes

No

a. If yes, did it result in injury?

Yes

No

Real time schedules help keep the caregiver on track, showing upcoming visits. The provider scheduling team can quickly and easily reroute care staff as need arises.

As the caregiver checks in or out, the system automatically captures the GPS coordinates and compares them to approved participant data. Caregivers are prompted to confirm tasks; supporting improved adherence to care plans. Visits outside of approved locations are flagged as exceptions for further review.

SIGNATURE **VOICE RECORDING**

Sandata Mobile Connect includes free text worker notes and non-clinical survey questions, designed to alert the case manager to emerging care needs.

Participants can also approve visits with an electronic signature at the point of care.

Our experience over the last 14 years has proven that many times a secondary EVV technology is required and our Telephonic Visit Verification is used as an alternate verification method. Through our "Assured Coverage" Program, you can feel confident that multiple technologies ensure visit verification and task collection are occurring at the point-of-care; helping to guard against allegations of fraud and abuse, while improving quality of care.
